SECURITY CLEARANCE

Active Top Secret / Sensitive Compartmented Information (TS/SCI) with Counter Intelligence Polygraph

---

PROFESSIONAL SUMMARY

Cybersecurity professional with experience supporting Defensive Cyber Operations (DCO), threat hunting, incident response, vulnerability management, and digital forensics within *Department of Defense* Cyber Defense Command (DCDC/JFHQ DODIN) environments. Experienced working with Security Onion, SIEM platforms, and large-scale DoD network telemetry to identify adversary activity and protect critical infrastructure. Skilled in OT/ICS security analysis, forensic data collection, and analytic mission planning. Maintains extensive hands-on experience through a personal cyber range / home lab used to simulate enterprise and adversary environments as well as professional training courses.

EDUCATION

Point Loma Nazarene University
Bachelor of Science in Computer Science: Cybersecurity (2020 - 2024)
Honors: Magna Cum Laude

James C. Enochs High School
High School Diploma (2016 - 2020)
Honors: California Scholarship Federation

CERTIFICATIONS

- **ISC2 Certified in Cybersecurity (CC)** (2023 - 2026)
- **CompTIA Network+** (2020 - 2028)
- **CompTIA Security+** (2022 - 2028)
- **CompTIA Pentest+** (2025 - 2028)
- **GIAC GICSP** (2024 - 2028)
- **Security Onion Certified Professional** (2025 - 2028)

TECHNICAL SKILLS

- **Security Platforms**
  Security Onion, SentinelOne XDR, Rapid7 IDR, Microsoft Sentinel, Wazuh, Elastic Stack, AlienVault OTX

- **Offensive / Assessment Tools**
  Metasploit, Nmap, Hashcat, Nessus, penetration testing methodologies
- **Infrastructure & Virtualization**
  Proxmox, VMware Workstation, VirtualBox, Docker, TrueNAS Scale
- **Networking**
  TCP/IP, network monitoring, vulnerability management, patch management, OT/ICS network security
- **Programming / Scripting**
  Python, Java, C++, C#, Bash, PowerShell
- **Enterprise IT**
  Active Directory, SSO (OneLogin), asset management, endpoint management
- **Digital Forensics**
  Autopsy, FTK Imager, Magnet Axiom, Wireshark, Evidence chain of custody, forensic imaging, Windows host analysis

---

HOMELAB / THREAT LAB

Designed and maintain a virtualized cybersecurity testing environment used for hands-on training in threat detection, incident response, and penetration testing.

Technologies include:

- Proxmox virtualization cluster
- Security Onion SIEM
- Nessus vulnerability scanner
- Metasploitable vulnerable targets
- WireGuard VPN infrastructure
- Docker hosted services
- Bitwarden password management
- Pi-Hole DNS filtering

Lab is documented at:
github.com/SenorC4/HomeLab

PROFESSIONAL EXPERIENCE

Cybersecurity Specialist TS/SCI

U.S. ARMY Cyber Command (Aug 2024 - Present)

40 Hours/Week

- Completed advanced threat hunting and incident response training focused on identifying adversary activity within enterprise and DoD network environments.
- Conducted cybersecurity characterizations and risk evaluations on critical infrastructure.

- Created data flow diagrams to help analysts visualize the threat landscape and potential network ingress points.
- Created a Security Onion threat hunting lab environment that has been used by multiple teams to maintain readiness and train junior analysts.
- Participated in ICS/SCADA security conferences and technical briefings focused on industrial control system threat detection and defensive strategies.
- Attended numerous training opportunities including Pentest+, Server+, CYSA+, ICS 612, ICS 410, ICS 310, Offensive Security SOC-200, and Security Onion In-depth.
- Created a specialized honeypot environment to track APT's specific TTPs as they evolved over time.
- Created SOPs and other documentation for the projects and training that I created so others could learn from them and continue them after I have left the team.
- Helped develop specialized solutions to collect forensic evidence on legacy systems.
- Utilized Pulse and other classified intelligence feeds to gain a deeper understanding of the cyber threat landscape and their evolving TTPs
- Queried and analyzed large-scale telemetry datasets in DoD big-data platforms: Gabriel Nimbus and Caspian Pigeon to identify potential threat actor activity across DoDIN infrastructure.
- Gained an understanding of the security and infrastructure architecture of both the DoDIN and the DREN by conducting defensive cyber operations in several DAOs
- Applied tool-agnostic threat hunting methodologies to identify malicious cyber activity across multiple analytic platforms.
- Assisted in DCO mission planning, Analytic Scheme of Maneuver creation and training cycle planning
- Volunteered to become the subject matter expert of multiple platforms that were required to complete our mission
- Trained and assisted other analysts by presenting weeklong classes on tools, techniques and concepts.
- Initiated and completed projects that have contributed to overall team readiness and lethality (Analyst laptop tool suite overhaul, Mission Data recovery and backup)
- Gave briefings to the Brigade Commander and the rest of the leadership team on current mission progress and specific toolsets we were developing

Cybersecurity Intern

U.S. ARMY Cyber Command (Jun 2023 - Jul 2023)

40 Hours/Week

- Competed in a NATO Capture the Flag (CTF) competition hosted by the Cyber Threat Emulation team.
- Shadowed a defensive cyber operations training mission covering kit preparation, network familiarization and validation, threat hunting, and reporting.
- Gained hands-on experience with Security Onion, Elastic, Kibana, and Microsoft Visio.

- Attended training on how to mark and transport classified material, and how to handle SCI

Information Security Analyst

Point Loma Nazarene University (Sep 2022 - May 2024)

20 Hours/Week

- Conducted vulnerability scanning, management and reporting with Tenable Nessus.
- Managed a security remediation project that would update, and enable industry standard security configurations on UPSs, environmental sensors, and digital signage systems.
- Managed patching of servers, VDI images, endpoints, and IoT systems.
- Monitored and managed the XDR platform SentinelOne.
- Conducted InfoSec reviews for new and existing vendors by inspecting their compliance documents and deciding overall risk.
- Spearheaded a vulnerability remediation project for over 300 printers.

Cyber Security Analyst Intern

FIT Solutions LLC (Feb 2022 - Jul 2022)

20 Hours/Week

- Provided 24/7 security monitoring and investigation of multiple client security feeds.
- Gained a working knowledge of multiple SIEM and ticketing platforms including Rapid7 IDR, Microsoft Azure Sentinel, AlienVault OTX, and ServiceNow.
- Coordinated with IT and security teams to implement remediation plans.
- Wrote and delivered monthly security reports to clients, which included security metrics, and top incidents.

Digital Forensics Intern

TransPerfect Legal Solutions (Jun 2019 - Sep 2019)

24 Hours/Week

- Utilized evidence management systems and tracked the chain of custody for raw digital forensic evidence.
- Set up digital forensics fly-away kits for remote site collections by installing, initializing, formatting and enabling RAID 1 on hard drives used for collection
- Researched and tested digital collection applications and workflows to improve efficiency.
- Managed IT needs for forensic workstations, including patching, licensing, and hardware replacement.

Help Desk Technician

Point Loma Nazarene University (Aug 2021 - Sep 2022)

20 Hours/Week

- Provided technical support for students, faculty, and staff.
- Set up auditoriums and conference rooms with A/V equipment for guest speakers and classes.
- Utilized Active Directory and OneLogin for user management.
- Managed enterprise computing and inventory systems.

Substitute Computer Technician

Modesto City School District (Dec 2020 - Mar 2022)

32 Hours/Week (Seasonal)

- Assisted students and staff with computer and network troubleshooting.
- Managed large-scale device rollouts.
- Utilized PXE boot to reimage large deployments of laptops.
- Upgraded networking equipment throughout the district.
- Repaired and renewed laptops and other IT equipment.

Teaching Assistant

Point Loma Nazarene University (Jan 2022 - Dec 2022)

6 Hours/Week

- Assisted students with Java and C++ programming coursework.
- Graded programming assignments and provided tutoring support.
- Proctored and graded exams.

ACHIEVEMENTS

- **DoD SMART Scholar Recipient**
- **ECTAP (ARCYBER) Fellows Graduate**
- **Founder & President** of Enochs High School Cyber Security Club
- **Founder & President** of Point Loma Nazarene University Cyber Security Club
- **AFA CyberPatriot Platinum Semifinalist** (2018, 2019)

- **1st Place** - California Mayor's Cyber Cup (2019)
- **1st Place** - Lawrence Livermore National Laboratory CTF Cyber Defense Challenge (2019)
